presentation

The School of Specialisation in Architectural and Landscape Heritage (SSBAP Unica) is a **third-level course** with a professional character, focusing on the **restoration, protection, and knowledge** of the architectural and landscape heritage. This course is aimed at providing a solid theoretical, methodological, and scientific background, through which specialists will have the skills to design projects and direct their execution.

During the two-year course of study, 120 university credits (CFU) are obtained. Once these have been achieved, the School releases the **Specialisation Diploma**. The title of Specialist in Architectural Heritage and Landscape is nationally recognised for participation in calls for applications by the Superintendency and the Ministry of Culture, as well as in tenders for heritage restoration.

aims

The aim of the School is to train highly qualified specialists in the field of **protection, restoration, conservation, enhancement and management** of the architectural and landscape heritage.

In accordance with the dictates of the Urbani Code and the principles of the Faro Convention, it intends to promote the development of skills required to operate in the territory, acquiring a preparation aimed at responding to **contemporary needs**, facilitated by a **multidisciplinary approach**.

The course will have an educational approach strongly characterised by **practical workshop activities**, applied to **real case studies** in the Sardinian territory, selected year by year in collaboration with local Institutions.

the final examination

The final examination consists of the discussion of a dissertation with the character of a **scientific-professional project** related to a theme on the architectural, urban or landscape scales.

the publication of deserving theses

The results of the high quality theses will be published in a dedicated series **Unica Press, with an international scientific committee.**

UniCa Open Journals is the platform for the creation and management of digital scientific publications of the University of Cagliari.

Publications are made freely available according to the canons of *Open Access*, in accordance with the principles of the *Berlin Declaration on Open Access to Knowledge in the Sciences and Humanities* signed by the University: open access to knowledge and maximum dissemination and visibility on the Web for scientific research.
