

An underwater photograph featuring a large, brownish-purple fish with a prominent eye and a slightly open mouth, swimming towards the right. The fish is positioned in the lower half of the frame. The background is a deep blue ocean with several smaller, silver fish swimming in various directions. The seabed is visible at the bottom, covered in dark rocks and patches of orange and red coral or algae. The overall lighting is soft, typical of an underwater environment.

AVVISO WORKSHOP:

Video-fotografia digitale a supporto della ricerca scientifica

Giovedì 23 Novembre: H: 15.15
