

<b>PhD Programme in LEGAL SCIENCES</b>	
DISCIPLINARY SCIENTIFIC AREA	12 - LEGAL SCIENCES
COORDINATOR	PROF. RICCARDO FERCIA
HEAD DEPARTMENT	DEPARTMENT OF LAW
DURATION	3 YEARS
LEARNING OUTCOMES AND RESEARCH TOPICS	<p>Our PhD in Legal Sciences is based on a curriculum offering lectures, seminars, and conferences. All these elements are combined together to foster the achievement of a rich set of learning outcomes.</p> <p>With members of staff teaching the programme coming from both Italian Universities and distinct foreign Universities, the curriculum spans over three years but most of the delivery happens normally during the first year from enrolment.</p> <p>Specifically, the academic activities of the first year are shared amongst all partners, and PhD candidates will attend - in addition to lectures in Cagliari, the programme of "Higher Education in Legal Sciences" organised by Universities of Venice Ca' Foscari, Siena, LUISS Guido Carli Rome, Catania, Florence, Navarra and Salamanca.</p> <p>In the 2025-2027 the programme will focus on the topic "<i>Legislation, Jurisprudence and Legal Doctrine in the Law-Making Process</i>".</p> <p>Furthermore, the programme will focus on the topics of the technological innovation, sustainability and inclusion.</p> <p>The timetable of PhD activities is normally prepared by the PhD board to suggest a multidisciplinary approach; all students are required to attend workshops and dissemination events, where they discuss publications about a common topic previously identified by the board itself.</p> <p>During the second year (preferably), candidates will spend a period abroad (min. 6 months) in a foreign institution. At the moment there are two international doctoral agreements in place, one with Université Sorbonne Paris Nord, and one with Universidad de Salamanca. Thanks to this, our PhD candidates will eventually be able to acquire a degree valid in both countries.</p> <p><b>LEARNING OUTCOMES:</b></p> <p>The programme aims to develop a high critical awareness of the complexity of legal phenomenon in all aspects including European and International context. The ultimate goal is to train a "European Jurist" capable of reconciling the diverse perspectives and needs of contemporary law. This is even more important in the light of the interaction between national and international regulatory frameworks.</p> <p>By the end of the course, candidates will master the critical attitude, methods, and the autonomy to carry out independent research and achieve novel results with measurable outputs.</p> <p>To do so, our PhD programme promotes the publication of students' works in Department's volumes or legal journals. Indeed, by the end of the course, it is possible to print and publish the entire doctoral thesis or part of it.</p> <p>Thanks to the partnership with the University Language Centre, PhD candidates will be required to achieve a B2-CEFR level of linguistic competence in one EU languages (English, French, Spanish, German and Italian for foreign students).</p> <p>Finally, PhD students will have to develop and demonstrate their IT skills related to legal research. In order to do so, they will be asked to attend lectures</p>

	in legal informatics and methodology of research.
