OVERALL OBJECTIVES

- The course takes into consideration the social function of the English language and it also considers it to be an international method of academic communication in a historical, judicial, economic and sociological context.
- It therefore, aims at deepening the knowledge of and consolidating the four fundamental linguistic skills, concerning both comprehension (LISTENING and READING) and production (SPEAKING and WRITING), with particular attention given to the comprehension of specific texts.

PREREQUISITES

- Students who wish to attend these classes should have a working knowledge of the English language at the intermediate level (at least **Level B2** of the Common European Framework of Reference for Languages).
- Students are required to attend **lab lessons with the CEL**, Collaboratore ed Esperto Linguistico, which complement the official 30 hour-course during the 1st semester. **John di Girolamo** (unica.it – Docente)

AIMS AND CONTENTS

- The course is divided into two teaching modules:
 - 1) General English: aimed at deepening the phonological, morphological, grammatical and syntactic aspects of the English language, expanding vocabulary and enhancing students' communication skills (Level B2/C1);
 - 2) Specific English: aimed at analyzing specialized texts relating to the lexical, syntactic, textual, discursive and rhetorical features of the language of politics and institutions in English-speaking countries (Level B2/C1).

The level of knowledge and competence required at the end of the course is Level B2/C1 Upper Intermediate-Advanced, according to the Common European Framework 2020 (Companion Volume)

Level B2 Intermediate

Common European Framework

B2

- Can understand the main ideas of complex text on both concrete and abstract topics, including technical discussions in his/her field of specialisation.
- Can interact with a degree of fluency and spontaneity that makes regular interaction with native speakers quite possible without strain for either party.
- Can produce clear, detailed text on a wide range of subjects and explain a viewpoint on a topical issue giving the advantages and disadvantages of various options.

What can you do with a C1 level in English?

- A C1 level of English allows for a full range of functionality at work or in an academic setting. The C1 level would allow for full autonomy in a native English-speaking country.

According to the official CEFR guidelines, someone at the C1 level in English:

- Can understand a wide range of demanding, longer texts, and recognize implicit meaning.
- Can express ideas fluently and spontaneously without much obvious searching for expressions.
- Can use language flexibly and effectively for social, academic and professional purposes.
- Can produce clear, well-structured, detailed text on complex subjects, showing controlled use of organizational patterns, connectors and cohesive devices.
